

Maintenance...

To keep your extensions and natural hair healthy you will need to have your extensions taken out and placed back in. We will never just lift up a bead / tape as it damages its integrity and you will have to come in regularly. The maintenance charge will be paired with the discounted refit charge.

Nano-bead extensions we recommend every 3-6 months at least and tapes need adjusting every 6-8 weeks but this all depends on your hair growth. Please book your appointment in advance as we may need to order extra hair for you.

Nano-bead maintenance from £45

Tape-in maintenance from £40

Hair extension removal from £30

Hair Extensions

Aftercare booklet

Washing advice...

- Only use hair-extension-safe shampoo and conditioner
- Brush your hair before washing
- When washing do not scrub your hair or scalp, use gentle motions
- Only use conditioner on mid-lengths and ends
- NEVER go to sleep with wet extensions

Take care when brushing your hair...

- Only use a soft bristle brush
- Wide tooth comb for tangles
- Gently brush downward holding the tape or bead
- Plait your hair before bed to reduce knots

Other advice...

- When using heated tools always use a heat protectant product

Please note...

Your hair extensions may feel strange for 24 hours and you may have a headache, this should pass, if it doesn't contact us.

Our advice...

If you look after your extensions you will not need to repurchase a new set for a good length of time!
